Computer Physics Communications 95 (1996) 221–222

Computer Physics Communications

Contents to volume 95

Feature paper

Toukmaji, A.Y. and J.A. Board Jr.
Ewald summation techniques in perspective: a survey 73

Computational physics

Kalkreuter, T.
Study of Cullum's and Willoughby's Lanczos method for Wilson fermions 1

Maillard, J. and J. Silva
Track parallelisation in GEANT detector simulations 1 17

Mastrangelo, V., D. Lippmann and I. Mehilli
Stochastic modelling of diffusion equations. Implementation and performance of the Mixage3D code on a multinode parallel machine based on the transputer T9000 23

Reed, M.S.C. and K.M. Flurchick
Investigation of artifacts due to periodic boundary conditions 39

Lütjens, H. and J.F. Luciani
A class of basis functions for non-ideal magnetohydrodynamic computations 47

Pollock, E.L. and J. Glosli
Comments on P^3M, FMM, and the Ewald method for large periodic Coulombic systems 93

Glück, F. and I. Joó
Monte Carlo type radiative correction calculations for neutron, muon and hyperon semileptonic decays 111

Bel'kov, A.A., A.V. Lanyov and A. Schaale
Calculation of heat-kernel coefficients and usage of computer algebra 123

Westerhof, E. and A.G. Peeters
A model for bootstrap current calculations with bounce averaged Fokker–Planck codes 131

Tian, B. and Y.-T. Gao
Beyond travelling waves: a new algorithm for solving nonlinear evolution equations 139

Seixas, J.M., L.P. Caloba, M.N. Souza, A.L. Braga and A.P. Rodrigues
Neural second-level trigger system based on calorimetry 143

Chang, Y.-C. and G. Li
Planar-basis pseudopotential method and planar Wannier functions for surfaces and heterostructures 158

Computer programs in physics

Kröger, M. and B. Kröger
A novel algorithm to optimize classification trees 58

Cheb-Terrab, E.S. and H.P. de Oliveira
Poincaré sections of Hamiltonian systems 171

Heck, E.L. and A.S. Dickinson
Transport and relaxation cross-sections for pure gases of linear molecules 190
